

HM Shoaib Hasan

BACKEND ENGINEER · GO & DISTRIBUTED SYSTEMS

6/9, Block - C, Lalmatia, Dhaka - 1207

☎ (+880) 1843548511 | ✉ shoaib.hasan1801@gmail.com | 🌐 www.shoaib.dev | 📱 /shoaibyte | 📺 /shoaib-hasan-568528210 | 📧 shoaib-hasan1801

Summary

Backend Engineer with **4+ years** shipping **Go-first** distributed systems end-to-end — **auth, billing**, observability pipelines, and REST/gRPC APIs at **30K+ concurrent users** on **AWS**. Comfortable across the stack (**TypeScript / NodeJS**) and across infra (**Docker, Terraform, Prometheus**). Excited by **AI/LLM** tooling and actively integrating it into developer workflows; ownership mindset, low-ego, ships early.

Work Experience

Placepoint (formerly PropCloud / Softwrld Ltd; acquired Dec 2024)

Dhaka, Bangladesh

BACKEND ENGINEER

Jun. 2023 – Present

- Architected **Go** microservices behind a **gRPC / REST gateway** on **AWS** (ECS, Lambda); **30K+ users**, sub-100ms p99, **99.9% uptime** — owned end-to-end
- Auth & billing** platform: JWT/OAuth2 multi-tenant RBAC (3 tiers), **AWS SQS** event-driven billing pipeline, saga/exactly-once delivery; **10K+/mo transactions**, **\$500K revenue**
- Observability**: Prometheus metrics, **Grafana** dashboards, distributed tracing — **40% faster** incident response; Docker, Kubernetes, Terraform, GitHub Actions CI/CD
- AI/LLM tooling**: integrated **Claude Code + Cursor** into eng workflow; shipped internal dev tooling that cut boilerplate generation time by **60%**
- Full-stack**: **TypeScript / React** frontend alongside Go backend; versioned **OpenAPI** contracts, PostgreSQL query tuning, Redis caching
- Led **6-person squad** (4 engineers, 1 QA, 1 designer); Linear sprint planning, story refinement & triage

Gorillamove

Dhaka, Bangladesh

SOFTWARE ENGINEER

Feb. – May 2023

- Go** gRPC services (Protocol Buffers) + REST APIs: **30% smaller payloads**, **20% faster**; distributed transactions via **RabbitMQ** saga pattern on bare-metal & cloud

Poridhi

Dhaka, Bangladesh

JUNIOR SOFTWARE ENGINEER

Jul. 2022 – Jan. 2023

- Java (Spring Boot)** REST & WebSocket services; **5,000+ concurrent connections** horizontally scaled with **Redis** session management
- Kubernetes** manifests & **Jenkins** CI/CD pipelines: **40% better deployment reliability**, staged rollouts

Technical Skills

Languages	Go (primary), TypeScript, Java (Spring Boot), Python; SQL
Backend	REST APIs, gRPC (Protocol Buffers), Auth/Billing Systems, Distributed Systems
Messaging	Kafka, RabbitMQ, AWS SQS (exactly-once, dead-letter queues)
Data Stores	PostgreSQL (indexing, partitioning, query tuning), Redis, MongoDB, Neo4j
Cloud & Infra	AWS (ECS, Lambda, SQS), Docker, Kubernetes, Terraform; bare-metal
Observability	Prometheus, Grafana, ELK Stack, CloudWatch, Distributed Tracing
Practices	AI/LLM tooling (Claude Code, Cursor), CI/CD, TDD, OpenAPI, Clean Architecture

Honors & Awards

2025	Excellence Award for Technical Brilliance , Recognized for outstanding technical contributions, code quality, and platform development impact	Oslo, Norway
2023	Award of Distinction and Certificate , 6th Place, International Blockchain Olympiad 2023 (Distributed Systems)	Amsterdam, Netherlands

Key Projects

Event-Driven Payment Platform

Placepoint – PropCloud

BACKEND ENGINEER

2023 – 2025

- Designed and built an **event-driven payment microservice** in **Go** using **RabbitMQ** (saga pattern) and **AWS SQS** for exactly-once delivery, processing **10,000+ monthly transactions** with **JWT / OAuth2** multi-tenant auth at **99.9% uptime**

Education

United International University

Dhaka, Bangladesh

B.S. IN COMPUTER SCIENCE AND ENGINEERING (COMPLETED 105/137)

Jan. 2019 - 2024
